1 Executive summary

This deliverable concerns the Final Dissemination Report of the DC-NET project.

First it describes how the dissemination strategy has been put into practice. It states that the strategy was built around the involvement of four main target groups:

- Member States, specifically the ministries and agencies responsible for cultural policies and/or research policies
- the cultural heritage research community
- the e-Infrastructure providers
- the national research and competence centres in the areas of cultural heritage and of e-Infrastructures.

Next, the dissemination tools created and used are presented with illustrations.

A section is devoted to an overview of the dissemination activities and events carried out since the beginning of the project.

In the last part, the impact of the project in the measures set out in the plan is analysed. The examination of statistical data and web searches shows that the dissemination objectives were fully met. The successful accomplishment of the dissemination plan lays down the basis for future activities of disseminating the results of the project.

2 Introduction

The purpose of this document is to report on the DC-NET project's dissemination activities based on the dissemination strategy defined at the beginning of the project. That strategy was described in deliverable D5.1. This report shows the execution of that plan.

The main objectives of the DC-NET project were to strengthen coordination between public research programmes in the digital cultural heritage sector in the participating countries, and to raise awareness of the possibilities offered by e-Infrastructures to help carry out those research programmes. Since the project aimed to increase the cultural heritage community's and the e-Infrastructures community's knowledge of each other, the dissemination activities have gained special importance throughout the project.

The dissemination activities contributed also to strengthen the creation of the Network of Common Interest that is continuing in the INDICATE project¹ and will still be an objective for the DCH-RP project (under negotiation)².

¹ www.indicate-project.eu

² The DCH-RP project is a Coordination Action selected in the Call 10 of e-Infrastructures. It represents a follow up of the DC-NET project being focused on the creation of a validated Roadmap for preservation in the Digital Cultural Heritage sector. Digital Preservation is in fact the first priority identified by DC-NET. Please, refer to D3.1 of DC-NET for the discussion about service priorities.

3 How the dissemination strategy has been put into practice

The dissemination strategy was formulated in the Dissemination Plan. The strategy was built around the involvement of four main target groups in the DC-NET project activities.

- *The involvement of Member States, specifically the ministries and agencies responsible for cultural policies and/or research policies*

The vast majority of the partners (7 out of 8) are representing the ministry of the MS responsible for culture. Thus a direct link was established to reach the decision makers responsible for cultural policy. The 8th partner is a public service integrated within the Belgian Federal Science Policy Office (and acting on behalf of it within the project) which is in particular responsible for the federal scientific and cultural institutions. The professional knowledge and network of the partners enabled to efficiently realize the delivery of dissemination materials and information to the first target group. In this respect the two EU-Presidency conferences (DC-NET international conferences under the Belgian and Hungarian Presidencies) must be mentioned where high ranking government officials addressed the meeting with keynotes.

These events were also a good opportunity to attract new national and international organisations to the DC-NET network.

- *The cultural heritage research community*

Since this target group is mainly attached to memory institutions (libraries, museums, archives) and the academic sphere, DC-NET dissemination activities were directed at reaching them directly in these institutions, and through events, conferences, workshops organised by e.g. professional bodies of the cultural heritage community at international level and via the workgroups at national level.

- *The e-Infrastructure providers*

In most of the participant countries this target group already had some relationship with the cultural heritage community and as a consequence it helped in some countries to get them rapidly involved in the dissemination process using these pre-existing links. However a lot of specific efforts had to be made to reach e-Infrastructure providers in cases where there had been no previous cooperation or only weak links with cultural heritage researchers. DC-NET participation and presentations at professional events and conferences organised by e-Infrastructure providers (at national and European level) helped to promote the project's objectives. This has been a successful operation and lead to a continued cooperation at national and international level. For instance, in the case of EGI, DC-NET was asked to join the "User Communities" group to represent the Digital Cultural Heritage virtual user community.

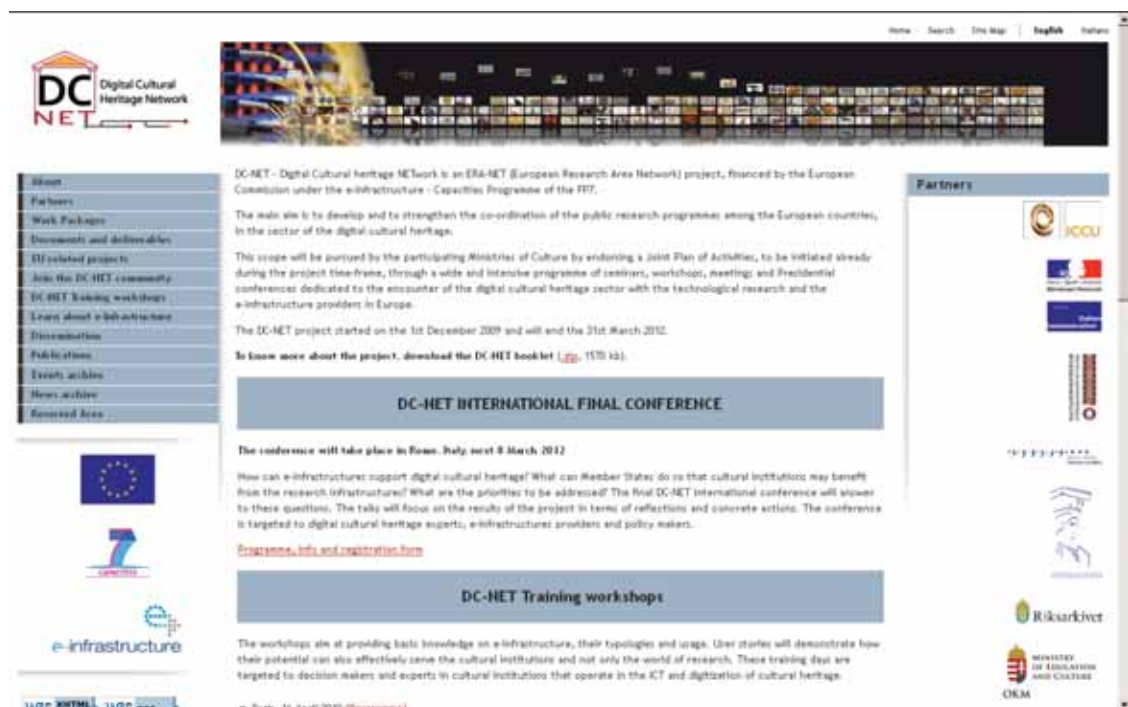

- *National research and competence centres in the areas of cultural heritage and of e-Infrastructures*

Many of the national research and competence centres were invited to take part in the national DC-NET Working Groups. For those who accepted the invitation a direct involvement was established to become aware of DC-NET activities and results. For non members national information days and training seminars were organised to raise awareness about cooperation possibilities for e-Infrastructures in cultural research, and to get trained to be able to use e-infrastructures to their full advantage.

4 Dissemination tools created and used

This section includes a list of the dissemination tools created and used (e.g. website, poster, leaflet, booklets, etc)

4.1 The website

The website was designed at month 2 of the project and laid out in deliverable D5.2 “Website & Download Area”. This deliverable describes the structure developed for the project website, the implementation work which already had taken place at that time, the content already integrated and the consortium’s plans for further development of the website.

The website was conceived as a working tool for DC-NET partners and contributors, and for all external users interested in DC-NET activities and relationship between digital cultural heritage and e-infrastructures.

The website presents information about all DC-NET activities, documents and deliverables, presentations, publications, dissemination material and training material.

The following image shows the final structure of the public website, constantly updated during the whole project.

During the whole duration of the project, SEO (Search Engine Optimisation) activities were carried out.

The website will be preserved and maintained by the project coordinator after the end of the project.

4.2 Promotional material:

Below the promotional material created and used throughout the project is presented. Some of the material was made available shortly after the start of the project like the logo and the DC-NET factsheet. Others were created to make publicity for the two main conferences or were made for distribution at these conferences. The postcard and the booklet were aimed at the attraction of new national and international partners. Finally the Booklet “Service priorities and best practices for digital cultural heritage” is made ready for the final conference and is also a blue print for further work as defined in the joint activities plan.

4.2.1 DC-NET logo:

4.2.2 DC-NET flyer:

It is a five page publication containing the objectives and the most important information of the project, the names and logos of the participants, a diagram of coordination and integration among actors, and the listing of the work packages.

4.2.3 DC-NET factsheet:

It is a two page leaflet briefly describing project objectives, partners and work packages.

4.2.4 DC-NET Poster

PDF 1.6MB

4.2.5 DC-NET Leaflet

(PDF 760KB)

4.2.6 DC-NET Depliant

(PDF 790KB)

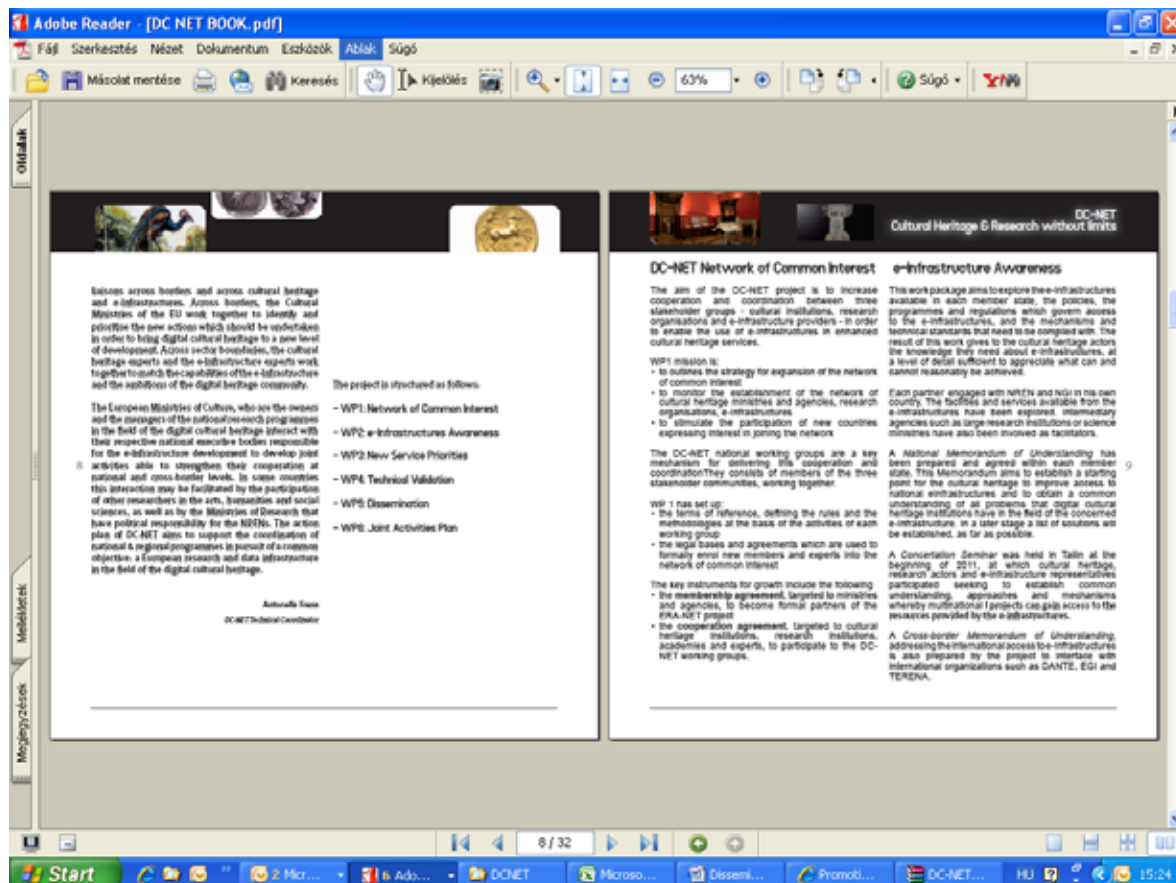

4.2.7 DC-NET Postcard

(PDF 520KB)

4.2.8 DC-NET Booklet

(ZIP, 1570 kb) – It is a 32 page publication with a detailed description of the project, and bilingual portrayal of the participating countries (in English and the native language of the partner). It has been printed in 2.000 copies and it is also downloadable from the website.

4.2.9 Booklet: Service priorities and best practices for digital cultural heritage

This booklet reflects one of the main outcomes of the project: the selection of the service priorities and the way the realisation of these priorities is done or started in cooperation with e-infrastructures. It will be of great value for all members of the DC-NET network and lays out the way to go for further cooperation. It is equally valuable for potential members of the DC-NET network.

The booklet has been printed in 3000 copies and it is also downloadable from the website.

4.2.10 DC-NET presentation in www.digitalmeetsculture.net portal

An updated presentation of DC-NET is provided on www.digitalmeetsculture.net. digitalmeetsculture is a portal and communication platform dedicated to disseminate information and to tell stories about the encounter of the digital technologies with cultura and art.

A set of articles have been published on digitalmeetsculture to illustrate to the target audiences how the DC-NET initiative is continuing beyond the funding period.

5 Description of the dissemination activities carried out since the beginning of the project

This section includes the description of all dissemination actions, providing a complete list of publications and attended conferences, events, project reports and working papers, external references.

Four major international public events were organised by DC-NET:

- Public conference to present the launch of the project, 17 February 2010 in Rome, with the participation of representatives from the European Commission, the eIRG and DANTE;
- DC-NET conference (EU-Presidency Conference), 29 October 2010 in Brussels, included in the programme of the Belgian Presidency of the Council of the EU
- DC-NET conference (EU-Presidency Conference), 23-24 June 2011 in Budapest, included in the programme of the Hungarian Presidency of the Council of the EU
- DC-NET final conference, 8 March 2012 in Rome.

5.1 Belgian Presidency of the Council of the EU, 29 October 2010, Brussels "DC-NET Conference""e-Infrastructures for cultural heritage"

Besides providing a presentation of the project and its preliminary results, the conference opened a debate on the possibilities e-infrastructures offer for services and research in the cultural heritage sector and on how the two communities (e-infrastructure operators and cultural heritage institutions) could better cooperate in the future not forgetting the necessary strong involvement of the research community. This debate was initiated by general presentations on the operation and landscape of e-infrastructures in the international context and stimulated by presentations on best practices, current research and new (visionary) developments. The conference reached representatives from the cultural sector, ICT and research, and cultural and science policy.

The conference took place in the Royal Library of Belgium. All the conference information, such as the programme, CVs of the speakers, abstracts and full presentations were put on the dedicated website www.dc-net.be. The proceedings were opened by the Director General of the Royal Library and by a representative of the Belgian Federal Minister for Science Policy. The representative of the European Commission introduced the European Union's Digital Agenda.

More than 120 participants, of 25 different nationalities, represented the ICT sector, the cultural heritage sector (in particular the large Belgian federal museums), researchers from different institutions and universities, and administrations and policy makers. Without saying, this was a very good opportunity to attract new national and international members to the DC-NET network.

Both participants' and speakers' reactions to the conference were very positive. As a result of the interest raised by the conference, an article about the DC-NET project was published in the *Cahiers de la Documentation/Bladen voor Documentatie*, a journal of the Belgian Association of Documentalists in the spring of 2011.

5.2 Hungarian Presidency of the Council of the EU, 23-24 June 2011, Budapest "Digitisation of cultural heritage and long term preservation: the role of e-infrastructures"

The Budapest Conference focused on the Europe-wide cooperation of heritage institutions as important actors of cultural heritage research and the e-Infrastructure providers with special emphasis on long term cultural preservation as a test bed for the new opportunities which e-Infrastructures can bring to cultural heritage. The Conference raised awareness of the potential of e-Infrastructures for the cultural heritage and laid down the basis of a Joint Activities Plan to promote coordinated effort for more tailored e-Infrastructure services made available to cultural heritage bodies.

The participation of experts from almost every member states of the European Economic Area was quite appealing, their number exceeded 130 (with 47 from outside the host country). The discussions were made available for even a much larger audience, since there was a real-time Internet broadcast of the conference. For those who missed the conference the broadcast is still accessible at the auditorium of the Hungarian National e-Infrastructure provider (<http://videotorium.hu/hu/events/details/425>).

At the end of the Conference the "Conclusions of the Budapest Conference" were accepted, which – among others - stress the importance of awareness and dissemination of the achievements of the DC-NET project. For the program and the text of the conclusions see the dedicated website of the conference: <http://dc-net.oszk.hu/> .

5.3 Final DC-NET Conference, 8 March 2012, Rome

The final international conference presented the achievements of the DC-NET project. 75 persons attended this final event of the DC-NET project representing 11 countries, 25 came from Sweden, Spain, Greece, Ireland, Belgium, Bulgaria, Slovenia, Hungary, Estonia and France. Important is that most of the new countries that joined the DC-NET network were also attending the conference. The new DC-NET network partner from Ireland explained how the DC-NET project has changed their vision on the possibility of the set up of a DCH e-infrastructure in cooperation with existing e-Infrastructures.

Programme of the final conference: <http://www.dc-net.org/index.php?en/22/events-archive/84/roma-dc-net-final-conference> .

5.4 Dissemination actions carried out to promote the DC-NET Project

| EVENT | PLACE | DATE | COMMENT |
|---|-----------|------------------|--|
| 2009 | | | |
| Improving Access to European Cultural Heritage – goals, ways, and means | Lund | 15 Oct. 2009 | Presentation of DC-NET |
| Eva Moscow | Moscow | 30 Nov. 2009 | Presentation of DC-NET on the conference programme |
| Kick-off meeting DC-NET | Rome | 17 Dec. 2009 | |
| 2010 | | | |
| Workshop on "Common Needs and Common Solutions for ESFRI: Research Infrastructures for SSH" | Brussels | 20 Jan. 2010 | Distribution of DC-NET flyer |
| IRCDL 2010, Digital Cultural Content: National and European Projects and Strategies | Padua | 28 Jan. 2010 | Presentation of DC-NET on the conference programme |
| eResearch 2010 Workshop | Brussels | 24 Febr. 2010 | Distribution of DC-NET flyer |
| ATHENA plenary meeting | Berlin | 25-26 Febr. 2010 | Progress of DC-NET on the meeting programme |
| ECRI2010 | Barcelona | 23 March 2010 | Distribution of DC-NET flyer+poster session |
| ERA-NET on stage | Brussels | 24 March 2010 | Participation to working groups |
| JPI-Cultural Heritage | Rome | 26 March 2010 | Participation in the meeting of the JPI Governing Board |
| EVA Florence 2010 | Florence | 21-22 April 2010 | Presentation of DC-NET on the conference programme |
| JPI-Cultural Heritage | Rome | 7 May 2010 | Participation in the meeting of the JPI Governing Board |
| SEEDI Conference | Sarajevo | 20-21 May 2010 | Presentation of DC-NET on the conference programme |
| e-IRG Workshop | Madrid | 17 June 2010 | Presentation of DC-NET on the workshop programme |
| JPI-Cultural Heritage | Rome | 2 July 2010 | Participation in the meeting of the JPI Governing Board |
| ATHENA plenary meeting | Ljubljana | 10-11 June 2010 | Progress of DC-NET on the meeting programme |
| INDICATE Kick-off meeting | Rome | 9-10 Sept. 2010 | References to DC-NET as part of the background strategic framework |
| EGI Technical Forum | Amsterdam | 14-17 Sept. 2010 | Presentation of DC-NET on the Forum programme , distribution of flyers and folders |
| ICT2010 - Networking session | Brussels | 29 Sept. 2010 | Co-organiser of a networking session |
| International Research | Rome | 30 Sept. 2010 | Presentation of DC-NET on the |

| | | | |
|--|-----------|------------------|--|
| Infrastructure Conference | | | conference programme |
| e-IRG Workshop | Brussels | 13-14 Oct. 2010 | Distribution of DC-NET flyers + folders |
| e-IRG Members meeting | Brussels | 15 Oct. 2010 | Distribution of DC-NET flyers and folders |
| OGF GRID 2010 Conference | Brussels | 24-28 Oct. 2010 | Presentations and distribution of promotional material about DC-NET |
| eChallenges 2010 | Warsaw | 27-29 Oct. 2010 | Presentation and acceptance of a paper about DC-NET (BUT not participated because of overlapping with DC-NET conference) |
| e-Infrastructure concertation meeting | Geneva | 5 Nov. 2010 | Distribution of DC-NET flyers and folders |
| EVA Jerusalem | Jerusalem | 15-17 Nov. 2010 | Presentation of DC-NET on the conference programme |
| Towards a Future Internet Workshop | Brussels | 22 Nov. 2010 | Distribution of DC-NET flyers and folders |
| ATHENA plenary meeting | Budapest | 13 Nov. 2010 | Progress of DC-NET on the meeting programme |
| 2011 | | | |
| DC-NET Concertation Meeting, Political background and strategic vision | Tallinn | 14 Jan. 2011 | |
| ESFRI SSH Working Group | Brussels | 18 Jan. 2011 | Progress of DC-NET presented during the the meeting |
| TELDAP 2011 | Taipei | 16-19 March 2011 | Progress of DC-NET on the conference programme |
| e-IRG workshop, Data infrastructures for social sciences and humanities - digitising and archiving cultural heritage | Budapest | 3 April 2011 | Progress of DC-NET on the workshop programme |
| EGI User Forum - Users Support Services | Vilnius | 11 April 2011 | DC-NET case study |
| EGI User Forum - GISELA & CHAIN Workshop, Digital Cultural Heritage Network | Vilnius | 13 April 2011 | Progress of DC-NET on the workshop programme |
| EVA Florence 2011 | Florence | 5 May 2011 | Progress of DC-NET on the conference programme |
| TERENA Networking Conference | Prague | 16-19 May 2011 | Presentation of DC-NET poster in the I2CAT stand, distribution of DC-NET flyers, participation to the BoF on e-Culture organised by INDICATE |
| INDICATE, DC-NET , CHAIN, EPIKH Workshop | Beijing | 26-27 May 2011 | Presentation of DCH initiatives in Europe and distribution of DC-NET flyers |

| EGI Community Forum 2012 | Munich | 27-29 March 2012 | Presentation of DCH initiatives, including DC-NET final results, in the frame of ESFRI and CHAIN workshops |

5.5 Training workshops organised by the DC-NET Project

The workshops aimed at providing basic knowledge on e-infrastructure, their characteristics, offered services and usage. User stories demonstrated how their potential could also effectively serve the cultural institutions and not only the world of research.

These training days were targeted to decision makers and experts in cultural institutions that operate in the ICT and digitization of cultural heritage.

The training seminars are not only pure dissemination events but are an important part of the networking activities that are described in Work package 6 as part of the joint activities. They can also be seen as the result of the Memorandums of Understanding that have been signed between the e-Infrastructures and DC-NET and where joint trainings and information exchanges are part of the agreed program of work. In certain cases the training seminars have been the starting point for a real collaboration between the e-infrastructures and the DCH organisations.

- Bruxelles, 27 January 2012 ([Programme](#) - [Presentations](#))
- Ljubljana, 6 February 2012 ([Programme](#) - [Presentations](#))
- Athens, 28 March 2012 ([Programme](#))

Detailed information about programme and presentation is available on the DC-NET website:
<http://www.dc-net.org/>

5.6 National Working Groups

In each participating country of the DC-NET network, national working groups were set-up to disseminate the information about the DC-NET project and to elaborate national input for the different work packages. These working groups were composed of representatives of: the ministries of Culture, the ministries of Research, funding agencies (research, culture), cultural institutions and e-infrastructure operators. Detailed information on the meetings of the national working groups has been put on the DC-NET website (reserved area). On average, 3 to 5 meetings took place yearly in each member country. They represent an important and strongly targeted part of the dissemination activities carried out.

6 The impact in the measures set out in the plan, to see if objectives were met

6.1 Statistical analysis of the project website

Below the use of the website is shown with the usual parameters (such as the number of unique visitors, the number of visits, etc). It can be seen that the access to the website doubled in 2011 compared to 2010.

2010

| Monthly history | | | | | | |
|-----------------|-----------------|------------------|-------|--------|-----------|-----------------|
| Month | Unique visitors | Number of visits | Pages | Hits | Bandwidth | Visits duration |
| Jan 2010 | 175 | 336 | 4440 | 14514 | 98.36 MB | 594 s |

6.2.2 Typing “cultural heritage e-infrastructures”, the results in the first page are even better:

The screenshot shows a Google search interface with the query "cultural heritage e-infrastructures" entered in the search bar. The results page displays a sidebar on the left with filters like "Tutto", "Immagini", "Maps", "Video", "Notizie", "Shopping", and "Più contenuti". The main content area shows search results, including a suggestion to search in Italian, a list of academic articles, and several project pages like "DC-NET.be", "INDICATE Project", and "e-Infrastructures for Cultural Heritage".

29 Nov 2011 – The goal of the project is to coordinate policy and best practice regarding the use of e-Infrastructures for digital cultural heritage in countries

6.2.3 Typing only “digital cultural heritage”, DC_NET is the first occurrence.

Typing only “<<DC-NET>>”, between “”, all occurrences in the first page, less two, are connected with DC-NET project.

6.3 The training seminars

The seven seminars as presented under 6.5 were attended by about 300 experts coming from the various DCH fields: there were directors and people working with strategies for digitization at museums, archives and libraries, people from research centers and universities, ministry of culture representatives, private companies dealing with ICT, local authorities, e-infrastructure providers.

Involvement of the national e-Infrastructures was a must for the training seminars. They were the excellent occasion to tighten the relationships with those national Infrastructure providers that subscribed the DC-NET Memorandum of Understanding between the project partners (NRENs and NGIs).

Representatives from BELNET and BEgrid (respectively the Belgian NREN and NGI), EEnet (Estonian NREN), NIIFI (Hungarian NREN), GARR (Italian NREN), IGI (Italian Grid Infrastructure), Arnes (Academic and Research Network of Slovenia, NREN), SUNET (Swedish NREN), GRNET (Greek National Research and Educational Network and National Grid Initiative) as well as the French Ministère de l'Enseignement Supérieur et de la Recherche (MESR) supported the

organisation of the national events and illustrated to the local public the services provided by the e-infrastructures they manage. It was mostly the first time that the cooperation between the cultural heritage and e-Infrastructure sector was so tight and fruitful.

These successful events proved the fact that DC-NET reached its objectives of bringing the DCH organisations and the e-Infrastructures together.

7 Future plans for disseminating the results of the project

All the members of the DC-NET Network will use their own channels to promote the scope of DC-NET and to communicate to the world-wide cultural heritage community about the existence of such network and its aims.

A set of mailing lists will be created at the first Assembly of the network and a task force will be established to maintain and to update these mailing lists.

The following types of mailing lists are envisaged:

- list of the members of the DC-NET Network
- list of the people who can be interested in the subjects addressed by the DC-NET Network
- list of the contact persons of the other initiatives that cooperate with the DC-NET Network

The mailing lists will be an asset of the DC-NET Network owned at the same level by all the members of the Network.

8 Conclusion

The dissemination activities of DC-NET have attained the objectives stated in Work Package 5 namely to make the information gathered by the project available to the widest possible audience, to encourage cultural heritage actors, including cultural ministries and agencies, to engage with e-Infrastructures and examine the delivery of new and exciting services for researchers, to support these objectives by creating and delivering dissemination materials, such as project website, brochures, etc, to organise two international conferences under Belgium and Hungary Presidencies of the EU, in order to raise the highest political attention, to contribute to the concertation and dissemination actions related to e-Infrastructures. Moreover these activities dealt with the core aim of the project that was to raise cooperation between e-Infrastructures and the cultural heritage community.

The dissemination plan that was presented at the beginning of the project included a dissemination strategy describing all dissemination activities and their targeted public.

The activities of WP5 have brought the knowledge generated by DC-NET to the targeted audiences by contributing, attending or organising events at national or international level.

The necessary dissemination materials, including a website, to support the participation of DC-NET at all activities have been made available shortly after the start of the project and have been updated regularly to provide the latest version of the project status and achievements.

DC-NET representatives participated to the ICRI Presidential Conferences in Prague, Barcelona and Copenhagen, and regularly attended with presentations to the eIRG Workshops as well as the EGI Forum and the TERENA Networking Conferences.

Two main events organised by DC-NET are the two international conferences to which cultural ministries and agencies from member states beyond the consortium were invited. These conferences were included in the programmes of the Belgian and Hungarian Presidencies of the Council of the EU. The major aim to bring the Cultural Heritage institutions and the e-Infrastructures in contact and start collaboration was well reached.

The final DC-NET conference took place in Rome on March 8, 2012 and gathered a wide interest among partner and non-partner countries.

At the end of the project, it can be stated that “DC-NET” has become a well known name in the world of national and international e-Infrastructures and those are looking out for further collaboration.
